FOI Request - 20180025

Request:
Could you please provide me with a breakdown of the offences recorded by the HADECS camera located on to the left of a gantry on the M1 Southbound just before the exit at junction 34. I've attached a link which provides a photo of the camera in question.
https://www.speedcamerasuk.com/database/YSY/ysy092.htm

An hourly breakdown of the offences recorded by this camera on the 12/10/2018 would be ideal, along with a breakdown of the average amount of offences recorded by this camera on a typical day.
Response:

South Yorkshire Safety Cameras Have no control over the setting of the Variable Speed Limits, where they are set or their duration. This is the responsibility of the Highways Agency who set the variable speed limits according to the ongoing current situation on the motorway, such as obstructions, broken down vehicles or accidents for example. South Yorkshire Safety cameras merely process any Offences detected. Because of the unpredictable nature of incidents, there is no consistent data for any given period or day on which to formulate an average.
